Dear Mr. Michael Liew,

EDEXCEL INTERNATIONAL VALUED CENTRE

This letter serves to record our appreciation for the outstanding contribution of TEG Education Group in promoting the BTEC HND qualifications in South East Asia. The success of Edexcel International in South East Asia, to a significant extent, is due to the pioneering spirit of TEG in promoting Edexcel International in Vietnam, Myanmar and in Singapore.

Edexcel International has enjoyed over 12 years of excellent relationship with TEG Education Group. TEG International College was the first BTEC centre in Singapore. As a pioneer, TEG faced many teething issues at the start of our relationship. The group persevered and consistently strove to meet our standards.

In 2006/7, TEG International College performed remarkably by achieving Grade A in **all** its BTEC qualifications. The grades were awarded by our Independent External Verifiers.

The fact that TEG International College was awarded these grades by three different Independent External Verifiers bears testimony that the quality of TEG is consistent by design. This was further supported by the fact that the grades were achieved across three different subject areas (*Business, Computing and Engineering*) and two different levels (*Level 5 BTEC HND and Level 7 BTEC Advanced Professional Diploma*)

Based on its good quality profile, TEG International College is one of a handful of BTEC centres that qualified to self-regulate and have only one External Verification visit per year.

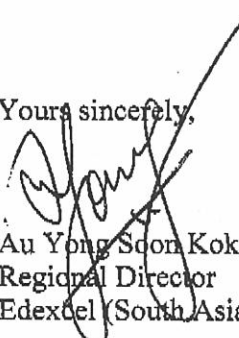

In 2004, Edexcel International endorsed TEG to be our quality partner in developing new BTEC centres in Myanmar and Vietnam. Today, we have five institutions of higher learning in Vietnam and one in Myanmar that offer the BTEC HND in collaboration with TEG as quality partner. The main role of TEG in these collaborations is to ensure quality support and delivery and TEG has executed this responsibility in the highest order for the past six years. None of these collaboration partners faced any quality issue that warrant a certification block.

In 2007, we have also endorsed TEG International College as a Model BTEC centre for aspiring centres in South East Asia. With the new premises and resources at Tanglin, we are confident that TEG will live up to its status of a Model Centre of Edexcel International.

Edexcel International hereby records our utmost appreciation of TEG Education Group and we look forward to greater success as collaborative partners.

Thank you.

Yours sincerely,

Au Yong Soon Kok
Regional Director
Edexcel (South Asia)
